

## 2.7 Nordox® 75WG

Fungicide

Cuprous oxide

**Nordox 75WG** is a microfine red/brown copper fungicide with greater activity and adhesive properties for preventing both CBD & CLR in Coffee, Early & Late blights in Potato & Tomato and Rust in French beans among other disease.

Nordox Super offers a wide distribution on the leaf surface.

*Copper oxide*..... 86% w/w (Equivalent to 75% Metallic copper)

### Mode of Action

Fungicide with protective action.

### Biochemistry

Because of its strong bonding affinity to amino and carboxyl groups, it reacts with proteins and acts as enzyme inhibitor

### Features & Benefits

Feature	Benefit
<b>Nordox WG</b> has superior performance	Better disease control
<b>Nordox WG</b> use less quantity to obtain best results (reduced dosage rates & fewer sprays)	Low application cost hence savings on cost of inputs
<b>Nordox WG</b> sticks better on leaf surface	Assurance on better disease control in rainy season
<b>Nordox WG</b> gives longer and more reliable protection	Prolonged control that minimizes the number of applications hence low input costs
<b>Nordox WG</b> is granular, has no dust especially when preparing mixture to spray	No dust hence safer to the user and the environment in general

### Application rate

**Coffee:** CBD - 70g/ 20L, CLR - 45g/ 20L

**Tomato / Potato:** early & late blight; 20-25g/ 20L.

**French Beans:** 20-25g/ 20L

**NB:** Use 1000L of water per Hectare

### Compatibility

**Nordox WG** is compatible with most neutral and slightly alkaline pesticides, neutral pesticides should be added last in the spray tank however tank mixture will be at user's risk.
