APPLICATION RATE

GREEN BEANS/ SUGARCANE	0.75 - 2.0LTS/HA applied in 120-600ls of water.
---------------------------	---

DIRECTIONS FOR USE

- APPLY to soil before, at, or immediately after planting and before crop/weeds emerge. Rain or irrigation is necessary within 10 days of spraying to thoroughly wet the top 3-4 cm of soil.
- Use high rates on heavy soils or where heavy grass infestation is expected.
- Use low rates on soils where sand content is in 50-70% range.
- Use sufficient agitation during mixing and application to maintain a uniform emulsion.
- DO NOT apply to waterlogged soils
- DO NOT apply when raining heavily.
- DO NOT irrigate to point of run-off for at least 2 days after application.

WEEDS CONTROLLED

Digitaria filiformis, ischaemum, horizontalis, sanguinalis
Panicum dichotomiflorum, laevifolium.
Setaria faberi, glauca, pallidifusca, verticillata, viridis.
Brachiaria eruciformis; Chloris virgata; Echinochloa crus-galli.
Gallinsoga parviflora; Nicandra physaloides; Urochloa panicoides.

Note: Limited control at the higher rate will also be given against *Amaranthus* Sorghum and *Cyperus* species.

SAFETY PRECAUTIONS
