

The Insecticide/Acaricide to control ticks and tse flies on cattle

DOMINEX 100 EC

Dominex 100 EC is a leading product for control of ectoparasites on cattle, especially tse flies and ticks. It gives excellent contact and residual activity.

Dominex may be applied as a spray to cattle but also in spray dips and spray races. Only very low application rates are required.

Active ingredient: alphacypermethrin as a 100 g/lt emulsifiable concentrate

DIRECTIONS FOR USE:

Dilute as follows:

(A) For hand sprayers			
Solo sprayer water (lts)	10	15	20
Dominex (ml)	5	7.5	10

(B) Dip tanks

Initial dilution = 1 : 2000 lts of water

Replenishment = 1 : 1250 lts of water

Spray on-off, especially around the tail.

Avoid spraying near the animal's eyes and mouth.

(C) Spray race

Initial filling = 1 : 2000 lts of water

Prepare 100 lts of dip wash plus 2.5 lts per animal to be sprayed

Use **Dominex** once per two weeks during the dry season and once per week during the rainy season and high tick challenge.

- Treatment is best done in the morning
- Apply the product alone and do not mix with other chemicals
- Water the animals well before treatment

- Read the label carefully before use

- Milk from treated animals can be consumed immediately after application
- Allow one day withdrawal period between treatment and slaughter.

Kiuadudu cha kuzuia kupe na mbugung'o kwa ng'ombe

DOMINEX 100 E.C

Dominex 100 E.C ni dawa inayoongoza katika kuzuia wadudu wanaodhuru ng'ombe kupitia kwenye ngozi hasa kupe na mbugung'o.

Dawa hii hugusana vizuri na mwili wa mnyama na hubakia kwa muda mrefu zaidi.

Dominex huweza kutumika katika kuoghesha ng'ombe kwa kutumia bomba la mkono, bomba la mashine pamoja na joshho. Ni kiwango kidogo tu cha dawa huhitajika katika kutumika.

Kiambato Amalifu: Ina gramu 100 za alphacypermethrin kwa lita, iliyo katika hali ya mafuta.

JINSI YA KUTUMIA.

Uchanganyaji:

(A) Kwa mabomba ya kutumia mkono.

Bomba la solo ujazo maji lita 10 15 20

Dominex katika mlis 5 7.5 10

(B) Majosho:

Kuchanganya kwa mara ya kwanza; changanya lita 1 ya dawa kwa lita 2000 za maji. Kwa kuongeza nguvu ya joshho baada ya kuoghesha; changanya lita 1 ya dawa kwa lita 1250 za maji.

(C) Bomba la kutumia mashine:

Kwa kuanza; changanya lita 1 ya dawa kwa lita 2000 za maji kisha andaa lita 100 za mchanganyiko wa maji na dawa pamoja na nyongeza ya lita 2.5 kwa kila mnyama atakayeogeshwa.

Ogesha kwa kutumia

Dominex mara moja kila baada ya wiki mbili wakati wa kiangazi na mara moja kwa wiki wakati wa mvua na kupe wengi.

- Ni vizuri kuoghesha asubuhi.
- Usichanganye Dominex na dawa aina nyingine.
- Wape maji ya kunywa wanyama kabla ya kuogeshwa.
- Maziwa ya ng'ombe aliyeoga dawa huweza kutumika mara baada ya kuoga.
