ICON 10CS

Material Safety Data Sheet 

This is an innovative water-based formulation of lambda-cyhalothrin utilising state-of-the-art micro-encapsulated technology.

It's designed for the control of mosquitoes, flies, coackroaches, ticks, bedbugs, Nairobi fly and many other household pests.

Active ingredient

100g/kg Lambda-cyhalothrin

Core Formulation

Capsule suspension

WHO classification

III

Packaging

62.5 ml

Mode of action

Provide invaluable personal protection against risks of disease transmission by mosquitoes and other biting insects. The micro-capsule formulation protects the active ingredient on treated fabric.

Rates of application

Apply at 62.5g in 8-10litres of water

Targets

Mosquitoes and other biting insects.

Main product benefits

- Highly effective against all mosquitoes.
- Excellent residual effectiveness
- Broad spectrum action provides control of secondary pests.
- Very low doses provide rapid mosquito knockdown and kill followed by a long residual protective action.
