**Crop tolerance**
When used as recommended, APRON STAR 42 WS is well tolerated by all recommended crops. In case of doubt, check crop tolerance first.

**Application technique / parameters**

**Equipment**
APRON STAR 42 WS can be applied as a dust on dry seeds or as a dust on pre-wetted seeds or as a water based slurry, with on-farm equipment like concrete mixers, tins, gourds, plastic bags or closed drums.

**Treatment procedure**

**Application as a slurry**
To prepare the slurry, follow the following procedure:
- Fill mixing tank with required amount of water.
- Pour gradually the necessary quantity of APRON STAR 42 WS into the water while stirring.
- Maintain agitation of the slurry during the whole time of use.
- The slurry should be used within 48 hours after preparation.

**Application on the seeds**
To apply the slurry on the seeds, a conventional seed treatment machine can be used, but they have to be properly calibrated with APRON STAR 42 WS slurry. On-farm equipment, such as rotating drums or concrete mixers can be used.

**Plastic bag application**
For small quantities of seeds, the product can be applied by plastic bag method:
- Use a strong plastic bag of 5 to 10 lt volume.
- Pour 5 g APRON STAR 42 WS in the bag.
- Pour 20 ml of water in the bag and mix the product and the water together.
- Add 2 kg of seeds in the bag, and shake the bag for 1 minute.
- Let the seeds dry. The treated seeds are ready to be planted.
- The plastic bag must be destroyed after treatment.

**Application as dust**

**Pre-wetted seeds**
- Wet seeds by applying 1 to 2 lt water per 100 kg seeds, and shaking.
- Apply APRON STAR 42 WS as a dust, with any conventional or on-farm made equipment.

**Dry seeds**
Application of APRON STAR 42 WS as a dust on dry seeds is possible but it gives uneven distribution and poor adhesion of the product on the seeds. It is therefore not recommended.

**Please note**
APRON STAR 42 WS can reduce the flow of seeds in a seed drill. The seed drill should therefore be calibrated with seeds treated with APRON STAR 42 WS.
Clean equipment thoroughly after use.

**Compatibility**
APRON STAR 42 WS has a broad spectrum activity and is not expected to be mixed with other products.

**Safety Aspects**

**Precautionary measures**
KEEP LOCKED UP OUT OF REACH OF CHILDREN and other unauthorised persons, and animals.

**Operator safety**
Avoid getting product in contact with skin, eyes or clothing. DO NOT inhale dust or spray mist. DO NOT eat, drink or smoke during work. Wash hands and face before eating, drinking or smoking. Wear protective clothing, during preparation and application of the product. After work change clothing and thoroughly clean protective equipment and clothing before re-use. Seed treatment should be done in a well ventilated area.

**First Aid**
If poisoning is suspected or any indisposition occurs, stop work immediately, apply first aid measures and call a physician. Show label to the physician. In case of contact with the skin, remove all contaminated clothing, wash affected body parts immediately with plenty of water and soap. Rinse splashes from eyes with plenty of fresh and clean water for several minutes. If inhaled, move to clean air. If swallowed, repeatedly administer medicinal charcoal in plenty of water. Seek medical advice immediately if a large volume of concentrate was ingested.
Note: Never give anything by mouth to an unconscious patient and never induce vomiting.
Environment and wildlife.
Toxic to aquatic organisms. DO NOT contaminate water used for irrigation or domestic purposes. DO NOT dispose of product wastes in water areas such as ponds, ditches, lakes, or in drainage systems.

Spillage and leakage
Remove heavily contaminated soil layer and bury in a safe place away from water supplies. Collect up spilt material thoroughly and bury in a safe place or put in a waste bin or in a plastic bag and dispose of on a landfill-site approved for pesticides. Rinse spill area with plenty of water. Note: Spilt product must not be re-used.

Product and Container disposal
Dispose of surplus product on a landfill-site approved for pesticides or bury in a safe place away from water sources. Dilute surplus application mixture, pour it broadcast on fallow land. Dispose of containers made of cardboard, paper or plastic by burning in a safe place. Stay away from the smoke and make sure that the smoke or fumes will not damage nearby crops, plants or animals. DO NOT re-use empty containers for any purpose. Note: Always comply with local legal requirements on disposal of pesticides.

Storage conditions
Store away from sun and damp, in a well ventilated area apart from food and feed, under lock and key. DO NOT contaminate food, feed or water. AVOID storage above +35°C. DO NOT stack containers higher than 2 metres, in order to avoid product compaction or damage.

Shelf life
At least two years from date of manufacturing, in unopened original containers.

User's risk
The user bears the risk for damage resulting from factors beyond the control of the manufacturer. Resistant strains of fungal diseases or pests may develop or may exist against which fungicides may not be effective resulting in crop loss. Since the occurrence of such strains cannot be forecast, neither the manufacturer nor its distributor can accept responsibility for any loss or damage caused by failure of fungicides to control resistant strains. All recommendations for use of the product are based on the current state of the manufacturer's knowledge. Since the manufacturer can not control the application, use, storage or processing of the product, the manufacturer cannot accept responsibility thereof.
